

# Software engineering

Moving to a server

# Looking forward

- Next week we start the vacation early, so no course / seminars
- Since the labs build on top of each other, we'll do them online, when it's convenient for you (team-leads contact me)
- The last 4 weeks will be about what you need to get the last assignment done, architectures and exam
- Just so, you don't have 2 exams right after each other and you have more time to get the bonuses done, I moved the written exam to Friday 7<sup>th</sup> of June, from 16:00 to room A2 (only available time)
